## **NOTICE ON THIRD-PARTY APPS**

Following a policy change, Google is no longer allowing users under 18 to access third-party apps without parental consent where required by law. This affects several third-party apps in use by the Marion School District, including Clever, Google Classroom, Canvas, Remind, and others.

Parents should be assured that the Marion School District will continue to actively review apps for student data privacy compliance. Parents who have questions or would like to opt their student out of using technology-based educational apps, should fill out [this form](#).

Parents should understand that opting out could cause substantial changes to the method of classroom instruction their student receives.
