Abby Haaks, student at Reeths-Puffer High School and member of the STATS program, presented a slideshow and a description of the CADCA peer-to-peer connections. CADCA has demonstrated that when all sectors of a community come together, social change happens. The CADCA coalition model emphasizes the power of community coalitions to community efforts that help the prevention of substance use and misuse before it starts, vaping, bullying, refusal skills and safe relationships.

The Reeths-Puffer STATS teams build on the positive and create a bridge between youth and adults that can help with the bigger issues. Younger youth have been able to receive the help they need by reaching out to STATS students who have been trained to connect them with the proper adults. They explore what negative interaction looks like and the importance of building support systems. It is essential to create an environment where young people feel empowered to make healthy choices and have supportive connections that steer them away from harmful habits.

Nate presented a slideshow that gave the board a glimpse into the Student Support Planning that is happening at R-P. Nate asked the board to think to themselves how they would answer the following questions: I wish every student graduated from R-P knowing....,

I wish every student graduated from R-P able to... and I wish every student graduated from R-P with an attitude of...

The K-12 Student Support Plan Decision Guidelines consist of: Specialized targeted instruction, Data is used to prioritize plan, Collaborative decision making and No labeling kids: On and off ramps.

A grade level chart was shown regarding the Components of K-12 Support Planning: varied intervention based on developmental zones, data-based entry and exit criteria, length/duration/frequency/student, student voice a choice/strengths/preference, size of group/Intensity of Intervention, who influences Intervention planning.

Future Moves: 1) Continued movement to increase support diverse learning with interventions. 2) Increased specialized services in reading, math and social emotional supports. 3) Flexibility in schedules like FLEX, Internships, On and Off Ramp intervention, Rocket Virtual and extended learning. 4) Utilizing grant funds from both state and federal levels for specialized services and supports.

Steve spoke to the board and presented them with the Emergency Flipchart that will be in every classroom and on every desk in the district. The district has Navigate 360 at their fingertips. They can carry it everywhere as it's on their phone. However, in a stressful situation a person's ability is compromised and trying to access the app on their phone could be very difficult. The flipchart will make it easy for them to grab and go if needed.

We are looking at securing a district & security officer for the Reeths-Puffer district.

Steve also discussed the bond timeline with the board. Much of the previous bond debt will be paid off by 2027. The 2027 bond when passed can reconstruct our whole district. Starting in February, we are requesting bids from construction firms. All the firms are strong recommendations. Everything is contingent of the bond passing.
