### Gifted and Talented Program

The Niobrara County School District #1 Gifted and Talented program offers opportunities to students that are functioning above grade level in multiple subject areas. The primary basis for this program is enhanced learning opportunities beyond standard curriculum progression.

Our students are monitored daily for achievement and skills beyond the grade level expectations. When a student has repeatedly demonstrated high levels of achievement, they will be guided through classroom level enrichment as an alternative to the standard grade level activities and instruction.

If a student continues to easily work through the enhanced curriculum, the student (and parents) will be offered opportunities outside of the regular classroom. This could include subject specific work in an alternate classroom or instruction and independent work in a separate location.

Students are identified through multiple processes and measurements. The processes include classroom observations, standardized testing, and achievement on placement test.
