

## **Niobrara County School District #1**

### **Library/Media Program**

Niobrara County School District #1 has created opportunities for students and staff to have and use high quality library services. Each of our schools has a staffed, well equipped, and highly functional library.

Our library services include literature available for check out or use in the library. Our district will be moving to having most of our titles available in digital format for student and family use. Our libraries have computers available for student and community use (during school hours) that can provide many services that are not available in house.

The staff in each of our libraries are always willing to help students, staff, and visitors with any questions or materials they seek. The library areas are comfortable, welcoming, and relaxing areas in each of our buildings.
