LIBRARY MATERIALS SELECTION AND ADOPTION

Library collection development is the ongoing process of assessing and refining the school library's educational resources to meet the diverse range of student needs. Material that is selected will align with Lake Forest School District curriculum and Delaware Department of Education standards while accounting for each student's literary and recreational interests as well as academic needs.

Materials are selected by the Librarian with assistance provided by faculty, staff, and students. The Building Administrator has final approval of the selected materials.

Criteria for selection, removal, and replacement of library learning resources can be found in each library within the District.
