# Network Access - Connecting to a mobile hotspot

The following will take you through the steps needed to connect your Windows device to a mobile hotspot.

## 1. Press and hold the power button until the hotspot turns on.

The lights on the top of the hotspot will turn blue when it is on.

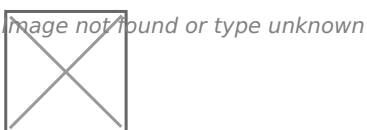

2. Once your hotspot in on, on your computer locate the image of the world and click it.

On the login screen the world will be located at the bottom right hand corner as pictured below:

If you are already signed in to your device the world icon will be located at the bottom right hand corner, next to the time, as pictured below:

3. Look for the wireless network that begins with "Alcatel_linkzone" in the list of available wireless networks
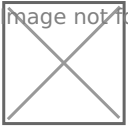

and click it.

4. Click "Connect".

5. Enter the "security key" for the network.

The network "security key" can be found on the top of your hotspot as pictured below:

6. Click "Next".

7. You are now connected.
