

TENNIS COURT SPECIFICATIONS FOR ASPHALT

Please submit bids for the following:

- ☐ Grout out and clean all existing cracks in asphalt. Fill cracks with hot pour rubberized crack filler. Place and compact asphalt down to crack areas to help with reflective cracking that may occur.
- ☐ Clean courts of all loose debris and tack coat for proper adhesion.
- ☐ Lay and compact 1 ½” of hot mix N70 surface asphalt.
- ☐ Adhere to the true plane slope requirements of The National Asphalt Paving Association and the U.S. Tennis Court and Track Builders Association, available at <http://sportsbuilders.org/page.php?id=17&from%5B%5D=28&>
- ☐ All materials and installation included
- ☐ The asphalt contractor is responsible for any damage done to the tennis court surface and any other school property by asphalt installers. Any such damage shall be repaired at the asphalt contractor's expense.
- ☐ Contractor is responsible for visiting courts in advance of bid to ensure full understanding of the scope of work.
