For Immediate Release

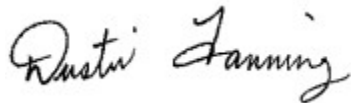

November 3, 2023

This week Public Water Supply District #10 notified Sturgeon School District that on Monday November 6, 2023 they will be performing work on the water lines and will be required to issue a boil advisory for Monday November 6 - Wednesday, November 8, 2023.

The boil advisory is in effect for only Sturgeon High School. It will not impact the K-8 building. As a result, the District has purchased bottled water for students and staff at Sturgeon High School.

We are thankful to the PWSD #10 for planning to do this work on a Monday when we are not in session and giving staff time to prepare and make arrangements needed to minimize the impact of school and activities next week.

Sincerely,

Dr. Dustin Fanning
Superintendent
