

## **Chase County USD #284 Covid Protocol**

### **2023 - 2024**

#### **Positive**

If you test positive for Covid, stay home and isolate for 5 days (day 0 is the onset of symptoms, or the date of the positive test result if asymptomatic).

You will then have 2 options:

1. On day 6, you may test again and if negative, return to school (testing MUST be done at school). If you still test positive, you will need to go back home and you are eligible to try again the next day.
2. On day 6, you may return to school and wear a mask through day 10.

Your release date is day 11.

#### **Household Members/Close Contacts**

If someone you know or someone in your household tests positive for Covid, no action is needed as long as you have no symptoms. As with any other illness, stay away from people who are sick, separate if able.

#### **Covid Testing**

Covid testing is available through the district again this year. One of the testing options we have available at the school allows for Covid-19/Influenza A/Influenza B, all in one test. There will also be OTC (over the counter) send-home tests available when the supply is restocked.

Testing is available at both buildings. Please contact Amber Schlup with any questions about illness or testing.
