Newark CCSD 66

Newark Families and Staff,

www.ngsd66.org

815-695-5143

Cold and flu season is upon us and we are seeing a few COVID positive cases. Mrs. Sapsford has included Wellness Weekly below. Take a peek! Washing hands, getting enough sleep and coughing coughs and sneezes goes a long way!

Our next Mobile Food Pantry is Saturday, December 2nd! If you are interested in being a permanent volunteer for the food pantry, please contact Mrs. Turman or Ms. Chase. Please join us to pick up food or volunteer 9:00 - 10:30 on 12/2 at NGS parking lot.

With the cooler weather upon us, be sure your student is dressed for outside weather. We recess in the morning at NGS and the afternoon at both MJH and NGS! NGS students need 3 things: coat, hat, gloves! We will need snow pants and boots after Thanksgiving break.

Student Council is sponsoring a food drive for Kendall County Food Pantry (our partner in our mobile pantries) from November 6 - November 21. See Flyer below for items needed. Our 7th and 8th grade students will be helping to volunteer at Kendall County Food Pantry in the coming weeks.

Basketball registration for the 2024 Newark Lisbon Rec Association season is now open! Registration is open to Second year Pre-K to 4th grade students. Please visit nlrecassociation.weebly.com for more information and to register. Registration ends December 15th.

Flyers for the Christmas Concert and Giving Tree have been added below. Thank you in advance for all the community support as we enter the holiday season.

Spirit wear orders have closed for this month. Next opening for ordering will be in February for Wayco Designs. Thank you to all who placed orders.

Time to Dine at Johnny K's on Tuesday, Nov. 21. Flyer is attached below.

Be sure to check the website: www.ngsd66.org and the district APP to keep up with all the information!

Short week - Just Monday and Tuesday! Happy Thanksgiving to all of our families, staff, friends and community! We are grateful every day for your support! We are thankful we get to support and educate our children. Have a wonderful Thanksgiving break! School resumes on Monday, November 28th!

Partners in Education,
Mrs. Turman and Ms. Chase

**NEIGHBORS.
EMPOWERED.**

A Note from the Nurse

Just a mid-year reminder that each day in the middle of the morning every class has a snack time. A mid-morning snack can help students be alert until lunch time.

Please pack your child a healthful, single serving snack such as a piece of fruit, a bag of cereal or crackers, a hard-boiled egg or two, yogurt, crackers and cheese or peanut or other nut butter, vegetables with hummus, applesauce, half of a peanut butter sandwich. Snacks with some protein, whole grains, fresh fruit or vegetables instead of sweets or high-fat foods help students stay alert and ready-to-learn, instead of sluggish.

10 Snacks to Fuel Active Kids

Celery + Peanut Butter

Pear Slices + Cheese

Mango + Greek Yogurt

Frozen Berries +
Milk = Smoothies

½ Banana + Walnuts

Apple Slices + Almonds

Peaches + Cottage Cheese

Carrots + Hummus

Snap Peas + Yogurt Ranch

Cucumber +
Turkey + Crackers

Newark Holiday Food Drive

****Student Council is hosting a food drive

(packaged)

Penguin Patch Holiday Shoppe

PRESENTED BY THE NEWARK/MILLBROOK PTO

KINDERGARTEN - 4TH GRADE - NEWARK GRADE SCHOOL IMPORTANT DATES:

Monday, December 4th – Create wish lists during PE class

Tuesday, December 5th – Purchase items by individual classes during PE

Wednesday, December 6th – Purchase items by individual classes during PE

The shop opens Monday, December 4th and runs through Wednesday, December 6th.

There are over 100 different gifts that can be purchased, and prices range from \$.25 -

\$12. We will be sending home money envelopes with a gift list in the next few days.

Please send cash or checks made out to Newark PTO. On their wish lists, they will be able to write down what they wish to purchase and the price.

Parents, we are also looking for volunteers to help assist with wish lists and purchases. If you are able to help and join in this excitement, please sign up on the signup genius that went out.

What's Going Around in Illinois? (Part 1)

<https://www.childrenshealthpartners.com/Resources/What-s-Going-Around>

Allergies

Seasonal allergies, or hay fever, are very common at this time of year. Typical symptoms include watery, itchy, red eyes; a clear runny nose; sneezing; and an itchy palate or throat. The most common triggers are trees in the spring, grasses in the spring and early summer, and weeds in the fall.

Effective non-sedating medications are available for children over the age of 2 without a prescription for treatment of seasonal allergies. These include loratadine (generic Claritin), cetirizine (generic Zyrtec), and fexofenadine (generic Allegra). These medications can be given once a day as needed for allergy symptoms. If you think your child has seasonal allergies and he or she is not responding to medication OR if you are not sure, call your child's healthcare provider.

Many children do not require allergy testing if they respond to treatment with medication as needed.

Bronchiolitis (RSV and wheezing in infants)

Bronchiolitis is a viral infection of the lungs, which affects primarily infants and toddlers. Some or all of the following symptoms are present with bronchiolitis.

1. **Wheezing:** a high-pitched whistling noise when your child breathes out. You may hear this yourself, or a physician may hear wheezing when she listens to your child.
2. **Rapid breathing:** at a rate of 40 breaths per minute or faster.
3. **Hard or Labored breathing:** You may notice that your child looks like he is pulling in around the rib cage, or the ribs are visible with breathing. Also, look for abdominal breathing, where the belly is going in and out with each breath.
4. **Cough:** a very prominent component of bronchiolitis. The cough is usually frequent, tight, and productive of mucous.
5. **Fever:** may or may not be present, and may be as high as 104-105 degrees.
6. **Runny nose and congestion:** is usually present, and usually there is A LOT of nasal drainage.

Cause

Bronchiolitis is caused by a narrowing and congestion of the smallest airways in the lung (the bronchioles). It is a viral infection, and there is no medication or antibiotic that will treat the virus itself. Any respiratory virus can cause bronchiolitis, but the Respiratory Syncytial Virus (RSV) is the most common cause. Older children and adults can catch RSV, but their symptoms are usually mild, like a common cold. It is spread by coughing or sneezing at a range of six feet or less, or by hand-to-nose or hand-to-eye contact. People do not develop permanent immunity to the virus, which means they can be infected more than once. Subsequent infections are usually less severe. People often confuse bronchitis with bronchiolitis. They are not the same thing. Adults may be treated with antibiotics for bronchitis. Bronchiolitis does not respond to antibiotics.

Expected Course

Bronchiolitis usually starts with a runny nose and congestion. Within 2-3 days, the patient starts coughing, wheezing, and potentially breathing hard. The wheezing and tight breathing usually become worse over 2-3 days and then begin to improve. Overall, the wheeze may last up to 7 days, and the cough up to two weeks. The most common complication (which occurs in about 20% of infants) is an ear infection. A lesser complication (which occurs in about 1-2% of children) is bacterial pneumonia. Fever usually comes at the beginning of the infection. If your child

develops a new fever over 100.4 for more than 24 hours later in the course of the illness, it may signify a secondary infection, and your child should be seen.

Home Treatment

1. Your child can be given Tylenol every 4-6 hours, or Motrin every 6-8 hours as needed for fever or comfort.
2. Warm fluids for coughing spasms - Thick sticky secretions in the back of the throat can cause coughing spasms. Warm liquids relax the airway and loosen the secretions. Offer warm juice if your child is over 4 months old. Infants less than 4 months can have warmed Pedialyte or Infalyte.
3. **Humidity**- Since dry air may make a cough worse, running a cool mist humidifier in your child's room may help.
4. **Suctioning the nose**- With a congested nose your infant may not be able to drink. Since most stuffy noses are blocked by dry secretions, suctioning may not be enough. Saline nasal drops or warm tap water will help loosen the mucous. Place 2-3 drops of saline in each nostril, wait about one minute, then bulb suction out. You can occlude the other nostril to get better suction. You can repeat this several times until breathing through the nose becomes more comfortable. Avoid over-suctioning, which may produce swelling or bleeding in the nasal passageway. You can also try putting your child in a very steamy bathroom to facilitate nasal drainage.
5. **Feeding**- Encourage your child to drink plenty of fluids. You may have to offer smaller, more frequent feedings.
6. **DON'T SMOKE!** Tobacco smoke aggravates coughing. Do not let anyone smoke around your child or in your home. Unfortunately, even an adult who smokes outside and then comes into a home exposes a child to a large amount of pollutants that are very aggravating to the lungs of infants of children.

Call your child's doctor if:

1. Breathing becomes labored or difficult. A good clue that your child is getting into trouble with his breathing is if he seems to be too tired from his breathing to drink fluids or play.
2. Breathing becomes faster than 60 breaths per minute (when NOT crying).
3. Wheezing becomes severe (very tight).
4. If fever lasts more than 3 days.
5. New signs or symptoms develop to indicate an ear infection (irritability, restless sleep, new fever, etc.)
6. Any additional questions or concerns.

Cough

We are currently seeing children and adolescents with cough, typically one of the most prominent and bothersome symptoms of viral respiratory infections at this time of year. Coughing is an important and beneficial reflex that our bodies need to clear secretions and to keep open our major airways during the course of a viral cold or upper respiratory infection. However, severe or persistent cough can be associated with asthma, pneumonia, sinus infections, and bronchiolitis, and should be evaluated by your health care provider.

If a cough at night is preventing your child from sleeping you can use an over-the-counter cough suppressant like Zarbees or Delsym.

Croup

We are currently seeing cases of croup, a viral respiratory illness that most often is caused by the parainfluenza virus. The cough and breathing that are associated with croup make it distinctly different from other viral colds or respiratory illnesses. This is because the parainfluenza virus infects and irritates the voice box, the vocal cords, and the windpipe. The cough is worse at night, and it has a distinct bark that sounds much like a seal's bark. Associated with the barking cough, your child may have difficulty when inhaling air, making a labored and whistling sound when

breathing in -- called stridor. Humidified air and fluids often are the most helpful treatments. A sudden croupy cough at night may be relieved by taking the child with you into a steamy room. Turn on the shower and let the steam fill the room and bring your child into the steamy room with you. If this does not relax the cough, dress the child warmly and take them into the cool night air. Contact their doctor if symptoms persist.

Enterovirus

We are currently seeing children and adolescents with infections caused by the enteroviruses, a group of viruses that often cause illness during the summer and the early fall months. The commonly used term "enterovirus" includes the coxsackie viruses, the echoviruses, and the enteroviruses. These viruses often cause a fever, and also may cause a rash, respiratory or cold symptoms, and vomiting with diarrhea. Hand-foot-mouth disease, a rash that involves those areas of the body, is a common enteroviral infection that occurs in children. More serious illnesses that are caused by these viruses include meningitis, heart infections, and eye infections. For mild illnesses caused by the enteroviruses, the best treatment is adequate rest, plenty of fluids, and fever control.

Enterovirus D68 (EV-D68)

Enteroviruses frequently cause mild illness in the summer and fall. This year, Enterovirus D68 (EV-D68), is a unique virus that shares features with the common cold viruses. Most infections are mild and self-limited and will last 5 to 7 days. A small group of children and adolescents, especially those with asthma, are experiencing more severe respiratory symptoms with wheezing and shortness of breath.

If your child has a history of asthma:

- Continue with your child's current asthma treatments
- Make sure your child has his/her inhaler and other asthma medications at all times
- If your child usually uses a controller medication (e.g an inhaled steroid) during the winter season or with colds, consider the possibility of starting the controller medication now.
- Make sure your child's teacher or caregiver knows of your child's asthma

Call 911 if your child has severe symptoms:

- Having serious trouble breathing (e.g. chest retracts, or lips/ fingers turn blue)
- is unresponsive or difficult to arouse
- Has slurred speech, paralysis, or severe headache

Make an appointment or call us if:

- Your child's cold seems severe and/or is uncomfortable with their breathing
- Your child can't sleep due to the respiratory symptoms
- Your child has ear pain or other significant pain that is not relieved with pain medication

Home Treatment

- Frequent fluids, rest and fever management.
- Frequent hand washing...cover your mouth when coughing
- Avoid kissing, hugging and sharing drinks with people who are sick.
- Disinfect surfaces in your house such as countertops and toys.

Giving Tree

The Holiday season is around the corner and for many of us is merry making time.

However, for some families, this is not the case. Every year, Newark District #66 extends the offer to families in need to list basic winter wishes for their children. Our school staff, outside agencies and PTO are involved in purchasing/donating funds for our families. This year, we are again extending the offer to our school community by setting up a Giving Tree, allowing everyone a chance to give this holiday season.

There will be a Giving Tree set up at Newark Grade School and Millbrook Jr. High with paper ornaments. If you wish to participate, please choose an ornament, which will have the students gender and wished-for gift. Please drop off the gift with the ornament attached as the gift tag to Newark Grade School by December 13th.

We are grateful for the community support this holiday season.

JOIN US FOR
OUR 2023
NEWARK GRADE SCHOOL

Holiday CONCERT

Thursday, December 7th

Concert starts at 6 pm

(students arrive by 5:45 pm)

Millbrook Junior High

12/5 | Rosati's Time to Dine

11/4/2023

Newark-Millbrook PTO
503 Chicago Rd
Newark, IL 60541

Dear Parents,

We are writing you on behalf of the Newark-Millbrook PTO to request donations for our annual Daddy/Daughter Dance scheduled for March 9, 2024. The donations are collected to make the raffle baskets and the sales of the tickets will go towards repairs to the school playground equipment, classroom supplies, and other essential educational materials for both the Newark Grade School and Millbrook Junior High.

We are creating gift baskets filled with fun merchandise, gift cards and services generously donated by local businesses (or parent donations) that will be part of the raffle ticket fundraiser at the event.

Should you make a cash donation or donation of goods or services, your business will be recognized at the Daddy/Daughter Dance as well as in the school Enews. We will also provide a donation receipt letter with the PTO's tax exempt ID number for your records.

Donations can be sent directly to Newark Grade School or Millbrook Junior High, or we can pick-up at your convenience. We ask that donations are received no later than Monday, January 29, 2024. If you have any questions or need further information, please contact Gilly Fordyce.

On behalf of the students, parents, and faculty of Newark Grade School and Millbrook Junior High, thank you for your consideration.

Sincerely,

Gilly Fordyce
PTO President

Karen Greer
PTO Vice President

WHAT IS S.A.S.S.?

S.A.S.S. stands for Screening, Assessment and Support Services.

SASS provides emergency screenings to determine the level of care needed (Deflection, Partial Hospitalization Program, and inpatient hospitalization) along with follow up care. S.A.S.S. is a service for students who have Medicaid, a Medicaid Managed Care Plan, are uninsured or under insured only.

FOLLOW UP CARE

After a child is assessed, regardless of the outcome of the assessment, the child is assigned a case worker for 90 days of service eligibility.

We encourage families to contact schools to continue follow up with the worker to coordinate care if child and parent were willing to sign consent at the time of assessment.

SCHOOL CONTACTS

Alyssa Olin, MSW, LCSSW
School Social Worker
NGS & MJH
AOlin@ncsd66.org
630-553-5435

MAKING A CONTACT/REFERRAL

1

ASK ABOUT INSURANCE

- S.A.S.S. only covers Medicaid, Medicaid Managed Care Plans, uninsured, or under insured clients.
- If you have private insurance, the guardian may wish to take the student to a behavioral health intake department in their insurance network.

Linden Oaks
852 S. West Street
Naperville, IL 60540

Ascension Mercy Behavioral Health
1330 North Lake Street
Aurora, IL 60506

2

PARENTAL CONSENT

- It is required that a parent/guardians be available to provide consent.
- Physical presence in the home by a parent/guardian is required. Be prepared to provide a time and location for evaluation.
- For non-english speaking families, a translator can be requested in your native speaking language.

3

PROVIDE SAFE LOCATIONS

- Be aware that assessments can take several hours in some cases. Ensure that as the parent/guardian you are able to be near the child until the assessment and recommendations have been concluded.

4

PLACING THE CALL

- Call CARES (1-800-345-9049).
- Provide detailed information about statements the child has reported or behaviors the child is presenting that warrant parent/guardian concern.
- Please share if the student has made any suicidal, homicidal, self-harm, or other threatening comments. Be specific with workers, quote or provide examples when able.
- If you are concerned that your child is using substances, be prepared to share specific information on regarding your concerns (behaviors, type of possible substance, if you have found substances)
- If you or your family feel unsafe with the child in the home, please share this information with the worker.

If you feel this is a medical emergency or you are in immediate danger, please call 911

Contact Information:

The SASS provider for Kane and Kendall County is Family Services Association of Greater Elgin. If you have any questions or concerns about SASS in your area, please feel free to reach out to Tameron Keefe, LCSW (Crisis Supervisor) or Janeth Barba, LCSW (Director of Crisis Services) at 847-695-3680.

WHAT IS SAFE2HELP IL?

Safe2Help IL is a program with a multifaceted approach to help prevent suicides, bullying, school violence, or other threats to school safety. The program offers a website with self help resources and videos, a classroom resource kit to help change the culture in Illinois schools, and a 24/7 **confidential** way to share information regarding safety issues impacting you or your friend's safety. Our goal is for students to **"Seek Help Before Harm."**

DID YOU KNOW?

- 70%** of teens have experienced struggles with mental health.
-  1 in 6 students experienced a major depressive episode in 2020.
