**SIGN UP IN 3
EASY STEPS**

1.

TEXT ALERT

You will be sent a secure SMS link to your registered mobile number. Click the link to enroll in ROC Watch.

2.

TAKE SELFIE

Next, take an unaltered selfie with your phone.

3.

UPLOAD ID

Take a photo of your government-issued ID. Driver's licenses, passports, and Military ID all work.

**YOU ARE NOW AN
APPROVED VISITOR!**

ROC Watch instantly authenticates your identity and assigns you as an approved visitor.

ABOUT ROC.AI

ROC.ai believes in the power of technology to make the world smarter, safer, and stronger - without bias or threats to your privacy. ROC.ai is proud to take its military-grade solutions and put them to good use in one of our nation's most vulnerable spaces - schools. ROC.ai's solution will assist school staff with campus awareness for on-site visits, pickups, events, meetings, and more.

SAFER SCHOOLS INITIATIVE

INTRODUCING ROC•watch

A proactive, intelligent video analytics and visitor management platform. It empowers schools to:

- Screen visitors before they enter the premises
- Detect weapons (guns) and intruders
- Monitor school-designated areas such as parent pick-up and drop-off
- Extend the security perimeter of the school campus
- Automate investigative searches after an incident

THE FUTURE OF CAMPUS SAFETY

ROC.ai, a world leader in computer vision and biometrics is excited to partner with Putnam County Schools on the launch of a next-generation school safety pilot program. Designed in accordance with the West Virginia School Safety Initiative, our new campus awareness system will improve the safety of our students, teachers, and staff by providing real-time monitoring, intelligence, and alerts.

DETECTION AND PREVENTION

Local law enforcement and school administrators collaborate on proactive watchlists of prohibited individuals, including registered sex offenders, discharged employees, and expelled students. ROC Watch automatically sends alerts to school security and designated authorities.

CRISIS RESPONSE

ROC Watch can detect weapons such as guns, instantly notifying local authorities to restrict access. It flags unapproved visitors attempting to enter the school, informing staff to verify them.

POST-CRISIS RESPONSE

During an evacuation, ROC Watch can identify a missing student's current location, with or without a face in view, and help trace their movement via the available camera stream.
