

BE A PILLAR OF SUPPORT FOR STUDENTS

When determination meets opportunity, the possibilities are limitless. After just 16 credits – one semester – students can complete the Pre-Apprenticeship for Electricians¹ courses which can prepare them to move into an electrician apprenticeship and potentially enter a career building complex, high-tech construction projects.

PRE-APPRENTICESHIP FOR ELECTRICIANS

RECRUITMENT – We believe it is our responsibility as a university to recruit those within our local communities who may have a passion for pursuing these courses.

RESPONSIBILITY – The four academic courses aim to capture the core values of honor, pride and responsibility reflected within the trade of an electrician. We seek to integrate the vital character elements needed to demonstrate strong performance in an apprenticeship.

RETENTION – As students of GCU, participants will receive access to academic and social resources and support that can help them complete their courses and achieve their purpose.

RESULTS – The four courses are designed to provide access to apply to an Arizona-based apprenticeship upon completion. Our goal is to provide a foundation for our students to work toward entering a position that yields results, technical skills and industry experience.

REQUEST – With a community focus, we would like to partner with organizations in the state of Arizona to solve the shortage of electricians together. With assistance from other institutions, we can expand our area of impact and share this opportunity with passionate students who are at an economic disadvantage.

¹ This pre-apprenticeship does not lead to licensure.

We offer multiple levels of sponsorship for organizations who wish to partner with us on sharing this opportunity with students. Each sponsorship tier gives you access to additional benefits and perks for your company.
