Preventive Prescription Benefits

The SAW Consortium is making a change in your prescription coverage effective 7/1/23 by expanding the list of preventive maintenance medications that will be covered at 100%. This new list is called Preventive RX plus and will be effective 7/1/23 under the Anthem plan. This list includes all of the drugs that are covered today under the ACA Preventive Medication List.

Health plans update formularies every year and can make changes throughout the year. Make sure to check the health care plan website for updates.

Preventive Generic Drugs Available at No Cost

Your health plan covers several preventive generic medications at no cost to you. These medications include drugs used to prevent the following conditions:

- Anxiety
- Depression
- Bipolar disorder
- Asthma
- High blood pressure
- Heart attack
- Stroke
- High cholesterol
- Diabetes
- Osteoporosis
- Prenatal nutrient deficiency

Visit your health plan website to view the complete list of conditions and specific medication names.

Preventive Prescription Benefits

Your healthcare plan includes a Preventive Rx Plus List. Drugs on this list will be covered as if the deductible has already been met, so the drugs are covered at 100%. The SAW Consortium is providing this enhanced benefit to make it easier for you to stay healthy today — and tomorrow.

Preventive Rx Plus covers drugs that may keep you healthy as they may prevent illness and other health conditions. You can get the products on this list at no cost to you.

Many drugs have multiple uses. Some drugs may be used for a preventive or treatment purpose.

For example, Anastrozole is a medication that is prescribed to prevent the formation of tumors in women who have an increased risk of developing breast cancer. It may also be used for treatment purposes when an individual has already been diagnosed with having breast cancer.

Brand-name drugs that have a generic equivalent available are not covered under this PreventiveRx benefit.

Not all drugs on this list may be covered by your plan. Some drugs, such as those used for cosmetic purposes, may be excluded from your benefits. Please refer to your Certificate of Coverage for coverage limitations and exclusions.
