SCS NEWSLETTER

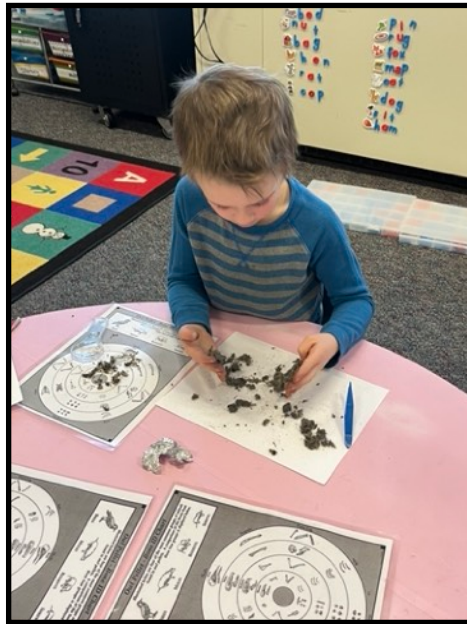

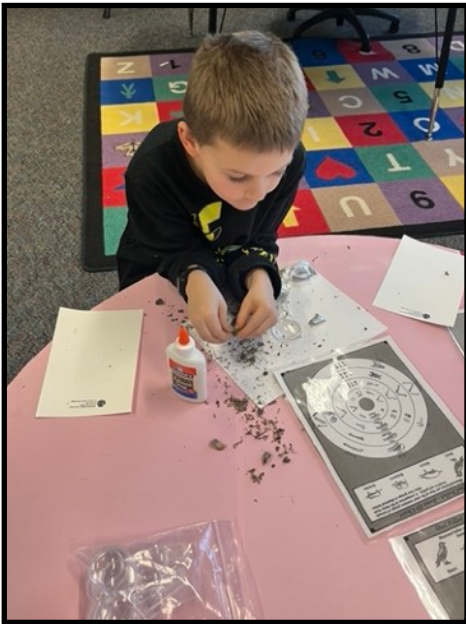

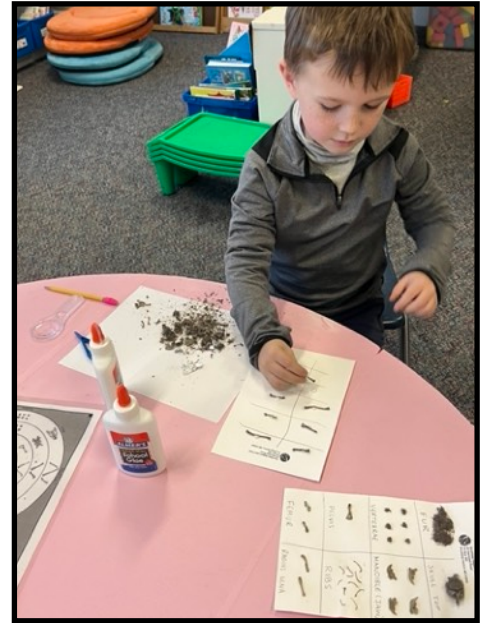

Caroline Ivens, our Physical Education and Healthy Living teacher welcomed her newborn son, Rhett William Ivens, born on Wednesday, December 27th.

Mom and baby are doing fabulous and came to visit the children this week!

Congratulations to the Ivens family!

Ms. Tibbetts' Classroom

During Forest School last week, we learned all about owls and then got to dissect an owl pellet. We compared the bones we found to a chart and guessed what animal the owl ate!

Ms. Clarke's Grade 2 Classroom

In science, second graders are learning about erosion, earth's surface, and landforms. Students in the pictures are shown creating a model of contrasting elevations, then demonstrating how rivers flow by marking the highest peaks, followed by spraying water on them. This experiment provided them with a visual of water flow and the erosion it can cause.

The second part of this lesson was to learn about what causes flash flooding and where in our country it is likely to occur.

Mrs. Browne's Grade 4/5/6 classroom

6th graders learned about polyhedra and finding surface area . They are wrapping up this unit by making icosahedrons that explain how to find area and surface area! Pictured is work by Mabel.

Fun in the snow...at least for a few days!
