To: The Falls City School Board / O.S.U. I.P.M. Coordinator

June 12, 2020

RE: Annual I.P.M. Report

Students, Staff, Building Occupants, Parents and/or Legal Guardians,

The Falls City School District Board of Directors is committed to a pest management plan that puts a priority on the health and safety of staff and students. This integrated pest management plan will be used on all Falls City Schools District facilities.

The I.P.M. plan works to achieve long term, environmentally sound pest suppression through a wide variety of tactics. Control strategies in this plan include structural and procedural improvements to reduce the food, water, shelter, and access used by pests. Pesticides will be used only in the most severe infestations or pest emergencies.

Falls City School District in accordance with the ODE Pesticides Program, Healthy and Safe Schools plan (HASS), Integrated Pest Management plan (I.P.M.) is required to provide annual notification to all building occupants regarding the presence or the use of pesticides that are used within, or outside district owned buildings/grounds, which are managed within the established I.P.M. plan by the I.P.M. Coordinator.

The I.P.M. plan surveys, reports, notifies, does periodic surveillances, re-inspects, monitors applications of pesticides and responds to infestations/emergencies and documents other related problems regarding the presence of pests in the school district buildings and grounds.

A copy of the Integrated Pest Management plan is available for review upon request at the District Office or it can be found on the district's web site. All inquiries or questions should be directed to Mr. Gilbert at 503-787-3521 ext. 1207.

Respectfully,

John W. Gilbert

The intent of this I.P.M. Coordinator is to educate staff and students about I.P.M. and how we can prevent the use of pesticides totally. I had no applications of any kind this year, it is my plan not to. Most things can be handled by simply not allowing clutter, maintaining a sealed building envelope so access cannot be made by unwanted pests. Making sure garbage cans are cleaned weekly, bags are pulled on Thursday evenings and there is no standing water anywhere. All penetrations throughout the district buildings have been foamed/screened or blocked off. Limited bushes, shrubs, and trees away from the building decreases the chance of pests also. Monitoring is done and recorded; costs are associated to prevention. The Falls City School District has several species of pests that are seasonal and are tolerated and they are carpenter ants, lady bugs, elm beetles and our resident honeybees. Occasionally a mouse will appear on a monitored baited trap because the rules have not been followed. It is normally an isolated incident.
