

REASONABLE SUSPICION ALCOHOL AND DRUG TESTING

The Board of Directors of the Burlington-Edison School District is dedicated to making the school program and extracurricular activities a safe and wholesome experience for every student. It is the Board's belief that students must remain free from the effects of alcohol or controlled substances while participating in school activities.

The Superintendent is directed to establish a drug/alcohol testing program for all B-EHS students permitting school officials to require students to submit to such testing if a reasonable suspicion exists that a particular student is under the influence of illegal drugs or alcohol at school or while participating in school activities.
