

CAMPBELL-SAVONA CENTRAL SCHOOL DISTRICT

GOAL

Student achievement and participation

The Campbell-Savona Board of Education will work with and support the superintendent's and administration's work in creating a Work-Based or Career and Technical Education Program.

The Board of Education will continue to dedicate quality Board meeting time to the review of student data for general education students and students at risk to reflect growth and achievement of the whole child.

GOAL

Communication

The Campbell-Savona Board of Education will leverage the district website, other social media and digital platforms, as well as more traditional communication methods such as the newsletter, to keep the community engaged and up-to-date on prominent issues affecting the community and in which the Board needs community involvement to improve outcomes for the district.

GOAL

Long-range district planning

The Campbell-Savona Board of Education will place additional emphasis in the 2023-24 school year on additional long range planning activity beyond normal district operations. The goal is to ensure that as a Board of Education we are taking extra steps to ensure the district's long-range successful operation in a rapidly changing and complex operating environment.
