

Bond Proposal Projects

Boyer City Transportation & Fieldhouse

What bond proposal projects are included at the Transportation Building?

Interior/Exterior Site Improvements

Infrastructure improvements to the garage include a new furnace and garage bay heaters that are original to the building.

Purchasing Buses

Eight school buses are included in the budget for this proposal. Our staff works hard to keep buses looking good and running smoothly, even with high mileage. Refreshing our fleet a few buses at a time has been a process that has served the district well in the past.

What bond proposal projects are included at the Fieldhouse?

The Rambler Fieldhouse is the school district's newest building, and there are no planned improvements with the 2025 bond. The Fieldhouse has become a valuable asset to the community. The space is open to the public for walking on school days from 6:30 to 8:00 in the morning and evening. Rambler athletes regularly use the weight room and track for consistent training. Additionally, the wrestling room has become an important addition, supporting the growth of the school's wrestling program and fostering community involvement.
