

## BUS SCHEDULING AND ROUTING

Adequate service, safety and efficient operation shall be the goals in the planning of school bus schedules, routes and stops.

The supervisor of transportation shall be responsible for the development of these transportation plans which shall be subject to the approval of the superintendent and the Board of Education.

The Board of Education of Burlington School District RE-6J believes that school is for all students and that the location of where a student lives should not penalize the student in regard to school attendance. The Board believes that if school is in session, all bus routes should be traveled; however, in cases of extreme conditions the Board through its superintendent and the bus supervisor will set up storm routes which may be used if conditions warrant the change from general practice. Storm routes may vary from year to year depending on bus routes and the condition of unpaved roads. This information can be obtained by calling the transportation supervisor.
