14	36001	North Barfield	Factory Bay	43	9.3	43	9.3

KEEP YOUR DAY SAFE:

1. *Idle Speed No Wake Zones** are:

- ALL interior waterways, canals and bays of the Island.
- In or on all waters of the Gulf of Mexico within 750 feet offshore of all beaches
- Within 300 feet of the beach adjacent to the S.R. 951/Jolley Bridge
- Operation of a vessel at a safe distance from all swimmers in the beach area is required at all times

**Idle Speed No Wake is defined as the minimum speed required to maintain steerage.*

2. *Navigating the Waterways:*

U.S. Coast Guard “rules of the road” apply to all navigational channels. Marco Island channels are marked with the standard **RED**, triangular signs and the **GREEN**, square signs using the conventional “red-right-returning” system.

3. *Drinking While Driving-Operation of a Boat:* is prohibited.

4. *Regulating Safety:* All boats must comply with United States Coast Guard Regulations.

5. *Registering Vessels:* All boats must be properly registered and documented.

6. *Mooring Restrictions:* Mooring to or damaging a navigational marker is prohibited.

7. *Anchoring Restrictions:* Anchoring or any other activity that interferes with navigation in channels is prohibited.

8. *Discharging to State Waters:* Discharge of untreated sewage is prohibited in Florida waters. Seek a pump-out station.

9. *Personal Flotation Device (PFD)* of proper size are required to be onboard for every vessel occupant and one throw-away device per boat; children under 6 years must wear a PFD while underway on any vessel less than 26 feet.

10. *VHF Marine Radio* **CHANNEL 16** is used for distress calls and is monitored for initial contact by other vessels and shore stations. **CHANNEL 16** is also used for hailing dockmasters your arrivals and departures to and from marinas. **CHANNEL 27** can be used for automated Radio Checks and **CHANNEL 40** has weather the information. *If you have a Digital Service Calling (DSC), radio must be wired to boat GPS so USCG knows your position in an emergency.
