

GRADING SYSTEMS

The Board will approve the grading and reporting system as developed by the faculty, upon the recommendation of the superintendent. The Board will support administration and professional staff efforts to find better ways to measure and report student progress.

The Board recognizes that any grading system, however effective, is subjective in nature, but will urge all faculty members to conduct student evaluations as objectively as possible.

Semester grades will be recorded on each student's 9-12 transcript. The school record is considered to be confidential and will only be released according to the law and the policies of the School Board.
