

Leprechaun Trap Family Project

Dear Families,

A Leprechaun has been sighted in our school and we would like to try to capture him. Leprechauns are tricky creatures, so our traps will need to be clever and creative!

In order to have the best possible chance to catch him, I'd like everyone in the school to make their own Leprechaun Trap. The trap can be made from simple household materials like boxes, plastic jars, bottles, or paper bags. Construction paper, glitter, and crayons or markers can also be used to help disguise the trap. Leprechauns are especially attracted to the color green, anything rainbow and anything shiny as well!

Remember, Leprechauns are stubborn and disobedient, so they will do the opposite of what they are told to do. If you want a Leprechaun to pull on a string or stand in a certain spot you must make a sign telling him to do the exact opposite! Please remember that this is a student project so the majority of the work should be done by him/her, although your guidance and supervision would be greatly appreciated!

We promise to share some of the gold with you if we catch the Leprechaun!

We will be setting up the traps on Friday, March 15, so please make sure the trap is returned on or before this date.

Thank you!

Mrs. Fuller
