School Re-Entry plan 2023-2024

With the current state COVID and considering the latest variants of the virus, the following plan is in place. This plan is dynamic and will change as determined by the administration.

Layered Prevention Strategies

- This guidance emphasizes implementing layered prevention strategies (e.g., using multiple prevention strategies together consistently) to protect students, teachers, staff, visitors, and other members of their households and support in-person learning.
- Cleaning and disinfection, ventilation, handwashing, and respiratory etiquette, staying home when sick and getting tested, contact tracing in combination with quarantine and isolation are also important layers of prevention to keep schools safe.

Meals

- Breakfast will be split with MS students in the gym and Elem in the cafeteria.
- Lunches have been split into five groups. These smaller groups will allow for social distancing in the cafeteria. Each of these groups transition into and out of their respective lunch times.

Training

- Staff Trained on identification of symptoms and associated procedures

Cleaning.

- Multiple times throughout the day
- Misting Rooms/Bathrooms/Halls/Caff/Gym multiple times a day (Will require additional equip)
- Handwashing and Hand Sanitizer

Sporting Events (On Campus)

- Will follow pre COVID procedures

Quarantine/Contact Tracing (Matches Current OK Health Dept Recommendations)

Schools should encourage daily symptom monitoring at home and school. Communicate and enforce the school's sick policy. This policy should include: 1. when an ill person should be kept home, 2. when an ill person will be sent home from school, and 3. criteria for them to return to school.

"A" Symptoms	"B" Symptoms
Fever/Temperature greater than 100.4 F	Nasal Congestion/Stuffiness
Sore Throat	Runny Nose
Cough	Muscle/Body Aches
Difficulty Breathing	Fatigue
Diarrhea or Vomiting	Chills
New Loss of Taste or Smell	Nausea
	Elevated Temperature less than 100.4 F
	New Onset of Severe Headache
Recommend staff/student be kept home or sent home if:	
Person has 1 "A" Symptom OR Person has 3 "B" Symptoms	

Schools should develop leave policies that encourage sick and exposed staff or students to stay home and get tested, when appropriate.

Five full days of isolation at home was recommended for SEO v/d 19. The day zero count begins on the first day of symptoms. If no symptoms are present, the day zero count begins on the day the positive test was collected. After leaving isolation, it is recommended to wear a mask in public for an additional 5 days. If a mask is unable to be worn, 10 days of isolation at home is recommended.

Masks

- Optional for students and staff

Enforce social distancing.

- When possible social distancing will be maintained. When it is not possible to maintain a physical distance of at least 3, it is especially important to layer multiple other prevention strategies, such as handwashing, and cleaning.
