

Vision Zero Draft 10/27/23

Vision Zero promotes safe driving and enforces learners in making proper choices before they get behind the wheel. On October 27 we are going to be using the day to run learners through presentations and driving simulations on winter driving preparation and safety/precaution.

Grade Levels will be brought down one at a time, during specific phases and be broken into groups of 7 to 8 learners. During the 50 minutes, the small groups will rotate through seven different stations that highlights a specific topic on winter driving and safety.
